

My Peace Workbook

Created by Michelle D. Elder, MSW, LMHC. This worksheet is a free educational wellness resource from My Reflective Collective.

Use what supports you. Skip, pause, adapt, or connect with a licensed therapist, healthcare provider, advocate, or trusted support if reflection brings something up.

Before We Begin: Why Peace Belongs to You

A note about building a life that does not require self-abandonment

Peace after a toxic relationship may not arrive as constant calm. It may first look like sleeping a little better, making

one decision without explaining it, enjoying an ordinary afternoon, keeping a boundary, accepting help, or noticing

that your body is no longer bracing in the same way.

My work as a licensed therapist has shown me that healing is personal, relational, cultural, physical, creative, and practical. My lived experience showed me that recovery also circles back. A hard day does not cancel the life you are

building, and needing support again is not failure.

These pages bring together self-love, health, movement, rest, nature, creativity, community, purpose, accountability,

and healthy connection. They are not a prescription for happiness. They are options you can test, adapt, and leave

behind when they do not fit.

I hope that something which helped me - a question, a pause, a boundary, a green space, a small plan, or a reminder

of worth - may help you in your own way. The goal is not to become a different person. It is to build a life where you

can remain present as yourself.

Peace is not the reward for healing perfectly. It is something you are allowed to

practice while you heal.

With care,

Michelle D. Elder, MSW, LMHC

Why This Workbook Was Given to You - and How to Get the Most From It

Use the closing volume to experiment with peace, not pressure yourself into a new performance.

This volume may have been offered because healing also needs somewhere to go. It helps turn insight into routines,

relationships, health follow-up, joyful experiences, practical plans, and a future organized around dignity and peace.

For each chapter or guided experience

- Choose a time and place that feel private and steady enough.

- Read the short education, then select one prompt rather than completing everything at once.
- Try more than one pathway: thinking, body awareness, mindfulness, art, nature, conversation, or action.
- Notice what helps, what does not, and what needs adaptation.
- End by naming one small next step and one form of support.
- Return later; answers may change as safety, health, and confidence grow.

The best use of this workbook is not perfect completion.

It is discovering what helps you live more fully.

What would make this volume meaningful and usable for me?

What I Want from This Volume

After learning what this volume offers, choose what you want to carry into it.

You have learned that this volume focuses on self-love, whole-person care, purpose, healthy connection, joy, accountability, and building a peaceful future. Name what you want peace to mean in your real life.

WHAT I WOULD LIKE TO RECEIVE FROM USING MY PEACE

WHAT I WANT TO PROCESS, RELEASE, BUILD, OR BEGIN HEALING

You may return to these answers. What you need from the workbook can change as you learn, heal, and hear yourself more clearly.

Disclaimer and Safety

Use this workbook as education and reflection - never as a replacement for individualized care.

This workbook is educational. It is not psychotherapy, diagnosis, medical treatment, legal advice, or a substitute for

qualified professional care.

Use it as a companion to your self-growth journey. It may complement - but does not replace - care from a licensed

therapist, medical provider, or other qualified professional. If strong emotions, memories, symptoms, health concerns,

or safety questions arise during these guided wellness experiences, pause and connect with an appropriate health-care provider, licensed mental-health professional, crisis service, or advocate.

CBT-style exercises, mindfulness, breathwork, somatic awareness, movement, expressive art, nature, spiritual ritual,

aromatherapy, massage, yoga, and other complementary practices may not fit every person or condition. Adapt, skip,

or stop them based on health, ability, medication, allergy, trauma history, culture, sensory needs, and professional

guidance.

Immediate danger: contact emergency services.

United States crisis support: call or text 988.

Outside the U.S., use local crisis and emergency services.

If a partner or former partner is threatening, stalking, monitoring, isolating, coercing, or harming you, individualized

safety planning may be important. Leaving can increase danger in some abusive relationships.

Right Now: An Anxiety Grounding Menu

Choose one small interruption that helps you reconnect with the present.

Do not force calm or complete every item. Stop anything that increases panic, pain, dizziness, numbness, or distress.

Orient and interrupt the loop

- Name five rectangles, four colors, three sounds, two textures, and one clue that tells you where you are.
- Read nearby words backward, name an animal for each letter, or count down by an unusual number.
- Let your eyes slowly trace the room's edges while your head stays comfortable.

Use sensation and movement

- Press your feet into the floor, push your palms into a wall, or squeeze and slowly release a towel.
- Hold a cool object or use cool water on your hands or face only if temperature changes are medically safe.

Avoid

extreme cold.

- Hum, chew gum, or try a mint or sour flavor if safe for swallowing, allergies, teeth, and sensory needs.

Borrow steadiness

- Text: I do not need solutions. Can you stay with me for ten minutes?
- Change rooms, sit near a doorway, step outside, watch something familiar, use a blanket, or care for a plant or animal.

Try one option for 30 to 90 seconds.

Did it help me feel even 5% more present, supported, or able to choose?

Whole-Health Check-In

Moving forward includes caring for the body that is carrying you there.

Use this checklist to prepare questions and organize follow-up. It is not a universal schedule. Medical, dental, laboratory, and screening needs depend on age, history, symptoms, medications, pregnancy status, disability, risks,

and access. Ask qualified clinicians what is appropriate for you.

This Is Not the End of Healing

It is the beginning of living with yourself on your own side.

The first volume welcomed you home to yourself. The second helped you reclaim your voice. This final volume asks a

new question: What kind of life can you build from here?

Moving forward does not mean you never feel grief, anger, fear, or longing again. It means those feelings no longer

make every decision. Peace becomes a practice: protecting your energy, meeting your needs, allowing joy, choosing

healthy connection, and creating a future that does not require self-abandonment.

You are not starting over.

You are starting with experience, wisdom, and a growing relationship with yourself.

How to use this volume

Complete pages in any order. Write, sketch, circle, or return later. Let plans be flexible enough to support real life. The

purpose is not to produce a perfect new self; it is to build conditions in which your actual self can thrive.

What do I hope peace will make room for?

An Eclectic Path to Healing

Try several evidence-informed and creative approaches; keep what supports you and leave what does not.

1. Which approaches help me think more clearly?
2. Which practices help my body feel safer or more present?
3. Which creative, cultural, spiritual, or nature-based practices feel meaningful?
4. What would I like to explore with a qualified professional?

There is no single correct doorway into healing. Choice, safety, culture, access, and personal meaning all matter.

CBT Thought Check

Examine a painful thought without shaming yourself for having it.

1. What happened, and what thought appeared automatically?
2. What emotion and body response followed?
3. What evidence supports the thought, and what evidence adds context?

4. What balanced thought is honest, compassionate, and useful?

A balanced thought is not forced positivity. It makes room for the whole picture.

Mindfulness: Return to Now

Practice noticing the present without demanding that it feel peaceful.

1. What can I see, hear, feel, smell, or taste right now?
2. Where is breath easiest to notice without changing it?
3. What thought can I label simply as "thinking"?
4. What deserves my attention in this one moment?

Mindfulness is not emptying the mind. It is noticing where attention went and gently choosing again.

Somatic Listening

Treat body sensations as information while staying within a tolerable pace.

1. Where do I notice tension, warmth, heaviness, movement, numbness, or ease?

2. What happens if I look around the room while noticing it?
3. Would my body prefer movement, stillness, pressure, distance, sound, or support?
4. What is one small response that feels safe enough?

You do not need to force a release or relive a memory. Small moments of choice and present-time safety count.

Expressive Art: Peace Has a Shape

Use image, color, and symbol where words feel limited.

1. Choose colors that represent peace as it feels today - not as it should look.
2. Draw a central symbol for the part of you that keeps returning.
3. Add lines showing what protects, nourishes, and connects it.
4. Where could one unfinished area remain open for future growth?

The image does not need to be beautiful, explained, interpreted, or shared.

Nature and Complementary Practices

Explore supportive rituals without treating them as cures or replacements for care.

1. Which nature practice feels accessible: sunlight, plants, gardening, water, sky, walking, or sitting outdoors?
2. Which complementary practice interests me: breathwork, gentle yoga, meditation, music, massage, aromatherapy, or spiritual ritual?
3. Are there health, trauma, medication, allergy, mobility, cultural, or sensory considerations?
4. Who can help me decide what is safe and appropriate?

Complementary practices can support well-being; they should not replace needed medical or mental-health treatment.

Putting Yourself First Without Becoming Selfish

Practice giving your needs a place in the decision instead of automatically placing yourself last.

1. Where do I routinely abandon my needs to prevent disappointment or conflict?
2. What am I afraid others will think if I choose myself?
3. What is the difference between protecting my well-being and disregarding someone else?
4. What decision would change if my needs counted equally?

Putting yourself first does not mean nobody else matters. It means you are included among the people whose needs deserve care.

Needs That Have Gone Unmet

Name needs clearly enough to begin responding to them now.

1. Which physical, emotional, relational, practical, creative, spiritual, or safety needs have been neglected?
2. Which need belongs to me to meet, which can be requested, and which needs professional or community support?
3. What has kept me from naming or meeting it?
4. What is the smallest respectful response I can offer this week?

An unmet need is not evidence that you are too much. It is information about care, support, boundaries, resources, or compatibility.

Self-Love as a Daily Practice

Turn self-love from an idea into repeated, observable care.

1. How do I speak to myself when I make a mistake?
2. What action tells my body it is worth protecting?
3. What promise can I keep consistently?

4. What would loyalty to myself look like today?

Self-love is not constant confidence. It is the decision not to become your own enemy.

Self-Care That Actually Restores

Separate genuine care from avoidance, pressure, performance, and expensive distraction.

1. What leaves me more regulated afterward?
2. What looks like self-care but leaves me depleted?
3. Which care is physical, emotional, social, practical, creative, or spiritual?
4. What support should not be done alone?

Real self-care may be comforting, boring, brave, practical, pleasurable, or boundaried.

The Whole-Person Care Audit

Notice what needs attention without turning your life into a self-improvement project.

1. How are sleep, food, movement, medication, and health care going?
2. Where do I need emotional or professional support?
3. Which practical task would reduce background stress?
4. Where do play, creativity, nature, and connection belong?

Care works best as a rhythm, not a rescue mission.

Body Basics Before Big Answers

Return to foundational needs when the mind wants to solve everything at once.

1. Have I eaten, hydrated, rested, moved, and taken prescribed medication?
2. What sensation tells me I need a pause?
3. Which form of movement feels supportive rather than punishing?
4. What appointment or health concern needs follow-through?

You are allowed to meet a basic need before finding a profound answer.

Rest Without Earning It

Challenge the belief that rest must be purchased through exhaustion.

1. What messages taught me to feel guilty for resting?
2. How does my body behave when it is overdue for rest?
3. What kind of rest do I need: physical, sensory, social, mental, creative, or emotional?
4. What can be good enough instead of finished perfectly?

Rest is maintenance for a human nervous system, not a reward for becoming useful enough.

Make Home Feel Like Yours

Use space, routine, and sensory details to support safety and identity.

1. Which area could feel calmer with one small change?
2. What objects, scents, sounds, textures, or colors feel like me?
3. What reminder of the past needs a new location or decision?
4. What ritual could mark arriving home?

Create options for different energy levels instead of relying on one coping tool.

1. What helps when I have only two minutes?
2. What helps when I have twenty minutes?
3. What helps when I need connection?

4. What helps when I need quiet, movement, creativity, or nature?

Peace does not have one recipe. Build a menu you can choose from.

Let Joy Be Safe Again

Practice allowing pleasure without waiting for every problem to be resolved.

1. What small pleasure asks nothing from me?
2. When does joy trigger guilt, fear, or the expectation that something bad will follow?
3. Who or what helps joy feel steady rather than chaotic?
4. What joyful experiment could I try this month?

Joy does not betray what you survived. It proves pain does not own every room in your life.

Rediscover Who You Are

Rebuild identity beyond the relationship and the role you played inside it.

1. What did I enjoy before I began shrinking or surviving?
2. What am I curious about now?
3. Which qualities feel most like me?
4. What identity, style, interest, or dream would I like to explore?

You do not have to recover an old version of yourself. You are allowed to meet who you are becoming.

Friendship and Chosen Community

Build belonging that allows honesty, individuality, and mutual care.

1. Who helps me feel more like myself?

2. Which connection needs repair, distance, or clearer expectations?
3. Where could I meet people around shared values or interests?
4. What kind of friend do I want to be without overgiving?

Healthy belonging makes room for your voice; it does not require you to disappear.

Practice interdependence instead of isolation or carrying everything alone.

1. What kind of help is hardest to receive?
2. What story do I tell myself about needing others?
3. Who has shown they can help without controlling or shaming me?
4. What specific, manageable request could I make?

Needing support is not evidence that you are failing. It is evidence that you are human among humans.

Practical Peace

Reduce avoidable stress through small steps with money, paperwork, health, and daily life.

1. Which unfinished task repeatedly occupies mental space?
2. What can be handled in fifteen minutes?
3. What needs expert help or a second set of eyes?
4. What system could make the task easier next time?

Practical care is emotional care when it gives your nervous system fewer fires to monitor.

Build meaning without making productivity the price of worth.

1. What parts of work feel meaningful, neutral, or draining?
2. What strengths do I want to use more often?
3. What does enough look like in this season?
4. Where can purpose exist outside paid work?

Purpose can be quiet. Worth does not rise and fall with output.

Release Without Erasing

Decide what you are ready to put down while keeping the wisdom.

1. Which argument am I still rehearsing?
2. What answer may never arrive?
3. What can remain true without being reviewed every day?
4. What ritual could mark a temporary or lasting release?

Release is not approval, forgetting, or forced forgiveness. It is choosing where your life energy goes now.

Trusting Calm

Learn that steadiness can be meaningful even when it is less intense than familiar chaos.

1. What sensations arise when life becomes quiet?
2. Do I confuse anxiety, uncertainty, or pursuit with chemistry?
3. What does safe excitement feel like?
4. How can I stay present long enough to learn calm?

Peace may feel unfamiliar before it feels good. Unfamiliar does not mean empty.

Meet Your Future Self

Imagine a supported future self without demanding certainty or perfection.

1. How does future me speak to themselves?

2. What boundaries protect their peace?
3. Who and what surround them?
4. What ordinary Tuesday tells me life has changed?

A future becomes believable when it includes ordinary details, flexible plans, and small bridges from today.

A Vision for a Healthy Life

Plan across several areas so one relationship is never asked to become your entire world.

1. What do I want for health and emotional well-being?
2. What do I want for home, money, work, or learning?
3. What do I want for friendship, family, community, and love?
4. What do I want for joy, creativity, nature, rest, and purpose?

A full life has many rooms. Love can live in it without becoming the whole house.

Goals That Protect Peace

Choose goals that support your values instead of reenacting pressure and self-criticism.

1. Why does this goal matter to me?
2. What is the smallest version that still counts?
3. What support, boundary, or environment makes success more likely?
4. How will I respond compassionately if the plan changes?

A peaceful goal has direction and structure without using shame as fuel.

The Next 90 Days

Turn hope into a short, realistic season of focused care.

1. What one area needs stabilization?
2. What one area wants growth?
3. What one area needs joy or play?
4. What will I intentionally postpone?

You do not have to rebuild every part of life at once. Choose a season, not a total reinvention.

When Progress Wobbles

Prepare for grief waves, triggers, loneliness, and old urges without calling them failure.

1. What tends to happen before a wobble?
2. What helps me recover sooner?
3. What choice should wait until I feel steadier?
4. Who belongs in my support plan?

Progress is not never wobbling. It is learning how to return with less shame and more support.

Dating Readiness - Not a Deadline

Decide whether connection supports your life now without using a relationship to prove recovery.

1. Am I curious about another person, or desperate to escape a feeling?
2. Can I keep routines, friendships, boundaries, and pace while dating?
3. Can I tolerate disappointment without abandoning my standards?
4. What would choosing not yet protect or make possible?

Readiness is not the absence of fear. It is enough steadiness to remain in relationship with yourself.

Your Blueprint for Healthy Love

Describe the daily behaviors that make love sustainable, mutual, and safe.

1. How do we communicate and repair?
2. How are privacy, consent, money, time, and independence respected?
3. How do words and actions stay consistent?
4. What happens when needs or boundaries differ?

Healthy love is not perfect agreement. It is mutual dignity, freedom, accountability, safety, and repair.

Promises to Yourself

Create commitments that remain yours regardless of who enters or leaves your life.

1. What will I no longer explain away?

2. What need will I take seriously?
3. What part of life will I keep for myself?
4. How will I return when I forget one of these promises?

A promise to yourself is not a threat of perfection. It is a path back home.

Self-Care Idea Bank: Body and Daily Life

Circle what sounds supportive, cross out what does not, and add your own.

BODY CARE

PRACTICAL CARE

Drink water or prepare a favorite nonalcoholic drink

Open one piece of mail

Eat something nourishing and accessible

Pay or plan one bill

Take prescribed medication as directed

Refill a prescription

Schedule or attend a health appointment

Make one appointment

Brush and floss teeth

Clear one small surface

Shower, bathe, wash face, or change clothes

Prepare tomorrow's clothing or bag

Rest eyes and reduce sensory input

Set a reminder or calendar event

Stretch, walk, roll, dance, garden, or move gently

Ask someone to help with a task

Use heat, cold, compression, or comfort if medically appropriate

Make a simple meal easier for later

Prepare for sleep with a softer routine

Unsubscribe, mute, block, or reduce a digital stressor

Step outside or sit near daylight

Gather documents into one place

Ask about pain, sleep, fatigue, or other symptoms

Choose what can wait

Self-care is sometimes soothing.

Sometimes it is the practical act that makes tomorrow less heavy.

Self-Care Idea Bank: Heart, Mind, Spirit, and Connection

Build a menu broad enough to meet different moods, needs, abilities, and energy levels.

EMOTIONAL / CREATIVE / SPIRITUAL

SOCIAL / GREEN / COMMUNITY

Name the feeling without arguing with it

Text someone a specific request

Write one uncensored page, then stop

Ask for company without needing advice

Use a balanced-thought worksheet

Attend a group, class, library, or community event

Listen to music that matches or shifts the mood

Spend time with a safe person

Create, color, collage, knit, cook, photograph, or

make

Play with or care for an animal

Read something comforting or absorbing

Sit outside, tend a plant, or notice the sky

Practice five minutes of mindfulness

Take a green break beside a window

Pray, meditate, attend ritual, or connect with
meaning

Volunteer in a manageable way

Notice three neutral or pleasant details

Plan something small to anticipate

Offer yourself one kind and believable sentence

Practice saying no or not yet

Set a time limit on rumination

Schedule therapy or professional support

Let yourself cry, laugh, or rest without explaining

Choose solitude intentionally rather than
disappearing

Ideas that fit me, my culture, my body, my budget, and my real life

Make It Self-Care

Transform an ordinary task by changing the intention, pace, environment, and support.

1. What task or need am I avoiding?
2. What makes it difficult: energy, fear, cost, pain, executive function, shame, or lack of information?
3. How can I shrink, simplify, pair, adapt, delegate, or schedule it?

4. What comfort, meaning, reward, company, or recovery can surround it?

Self-care is not only what you do. It is also how gently, realistically, and respectfully you help yourself do it.

Getting Active With Care

Use movement to support energy, function, mood, and connection - not to punish your body.

1. What movement do I enjoy, tolerate, or feel curious about?
2. What health, pain, disability, balance, medication, pregnancy, or safety factors should I discuss with a clinician?
3. What is the smallest starting amount that feels realistic?
4. Where, when, with whom, and with what equipment or adaptation could it happen?

Some movement is more supportive than none. Start within your abilities, build gradually, and seek individualized medical guidance when needed.

Accountability Without Shame

Create structures that help you return instead of systems that punish you for being human.

1. What am I choosing to practice, and why does it matter?
2. Would a person, calendar, group, app, appointment, visual cue, or prepared environment help?
3. How often will I check in, and what will I track besides completion?
4. What is my return plan after a missed day?

Accountability is a compassionate agreement with your future self - not surveillance, humiliation, or a perfect streak.

My 30-Day Peace Plan

Choose small actions that make the future visible in the present.

Select one practice in each category. Keep it gentle enough to repeat.

Body: sleep, food, movement, health care, medication, or sensory regulation

Heart: compassion, grief support, therapy, journaling, or honest connection

Life: home, money, work, paperwork, learning, or a practical task

Joy: nature, creativity, play, music, laughter, rest, or curiosity

The plan succeeds when it supports you - not when you perform it perfectly.

Thirty Days of Returning

Track contact with your intentions, not perfection.

In each square, add a check, color, symbol, word, or tiny note. A mark can mean you practiced, adapted, rested intentionally, asked for help, or returned after missing a day.

A Letter From the Life Ahead

Write from a future that feels steadier, fuller, and genuinely yours.

Imagine that a future version of you is writing back. They do not need a perfect life. They have simply practiced choosing peace often enough that it has become familiar.

Let them tell you what mattered, what did not, which small choices changed everything, what love feels like now, and

what they are grateful you began today.

Dear me, thank you for beginning...

Keep this letter where hope can find you.

Safety and Scope

Support the future by protecting the person who is living today.

This workbook provides education, reflection, creative exercises, and general wellness planning. It is not psychotherapy, diagnosis, medical treatment, legal advice, or a substitute for individualized professional care.

Mindfulness, breathwork, movement, expressive art, nature, spiritual ritual, aromatherapy, massage, yoga, and other

complementary practices may not fit every person or condition. Adapt or skip them based on health, disability, medication, allergy, sensory needs, culture, trauma history, and guidance from qualified professionals.

Immediate danger: contact emergency services.

United States crisis support: call or text 988.

Outside the U.S., use local crisis and emergency services.

If a partner or former partner is threatening, stalking, coercing, monitoring, isolating, or harming you, individualized

safety planning may be important. Separation can increase danger in some abusive relationships. Consider contacting

a domestic violence advocate from a safer device or place.

You Are Already on Your Way

A closing page for the whole three-volume journey.

You welcomed yourself home.

You reclaimed your voice.

Now you are choosing peace.

Not once. Not perfectly. But faithfully, one life-giving choice at a time.

Your worth was never waiting at the finish line.

Your future does not need permission to become beautiful.

And the love you are learning to give yourself can begin again today.

May the life ahead feel less like proving

and more like belonging.
